JINK

Flagship access control

JINK Smart Access Control

Matter over Thread

Thoughtful access. An effortless arrival.

Access-control terminal only. Other equipment sold separately.

Technical specifications

Product	JINK Smart Access Control
Positioning	Flagship access control
Hardware reference	H3D
Dimensions	150 × 80 × 22 mm
Appearance	Black front / graphite-gray surround
Power	External 12 V DC
Local access	Face, fingerprint, PIN, card
Connectivity	Matter over Thread
Network requirements	Compatible Matter controller + Thread border router
Included product	Access-control terminal
Separate equipment	Power supply, electric lock, exit button, bell, cards, remote controls and network hubs

Connectivity

A compatible Matter controller and Thread border router are required; one device may provide both roles. A standard Wi-Fi router does not replace a Thread border router. Remote access also requires an online hub and platform support.

Examples of Matter-enabled platforms. Device-type support, available controls and credential management depend on the platform, terminal firmware and region.
